

## Bluegrass Blueberries Fertilizer Schedule using Monty's Products

*The following is Bluegrass Blueberries fertilizing schedule using Monty's products. Bluegrass Blueberries and Monty's are not in partnership nor should be held liable for individual results. Contact Monty's or consult the Monty's product label for exact ratios per gallon.*

### **Early Spring:**

We apply 8 ounces of Biostrain, 64 ounces of Monty's Liquid Carbon, and 32 ounces of Microhance per acre. We just use one application in Early Spring.

### **Spring:**

Once blueberry plants start to leaf out we apply 24 ounces 2-15-15 Root & Bloom and 32 ounces of Microhance per acre. We apply this EVERY OTHER WEEK.

### **Summer:**

Once plants are done fruiting we apply 24 ounces 8-16-8 All Purpose Growth, 32 ounces of Monty's Liquid Carbon, and 8 ounces of Biotrain per acre. We Apply every other week, or every week.

### **Fall:**

In the middle of October we will spray 24 ounces of 2-15-15 Root & Bloom and 32 ounces of Monty's Liquid Carbon per acre. We apply each application 2 weeks apart.

### **Late Fall:**

In the middle of November we will spray 32 ounces of Agri-N per acre. We apply this twice. We apply each application 2 weeks apart.
